

# Arshia Azadian

Full Stack Developer

18 years old | Eindhoven, Netherlands

Aspiring AI enthusiastic & Software Developer

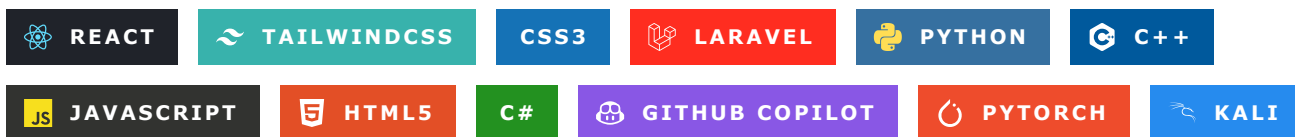

## About Me

---

I'm a passionate 18-year-old full stack developer from Eindhoven, enthusiastic about building robust applications and exploring new technologies. My expertise spans across backend and frontend development with a focus on creating efficient, scalable solutions.

While backend development is my strongpoint, particularly with **Laravel**, I'm also actively developing my frontend skills. Beyond web development, I have a deep interest in creating **Windows native applications using C++** and graphics APIs like **OpenGL** and **DirectX**. I'm also passionate about **Python and machine learning**, with the ultimate goal of entering the **AI development scene** in the future.

I'm fluent in **English, Dutch, and Persian**, which enables me to work effectively in multicultural environments. I excel at both **solo and team work**, quickly adapting to new situations and technologies. My commitment to continuous learning drives me to constantly expand my skill set and stay current with industry developments.

## Skills & Technologies

---

### Programming Languages

C++, PHP, JavaScript, HTML/CSS, Python, C#

### Frameworks & Libraries

Laravel, React, TailwindCSS

### Databases

MySQL, SQLite

### Tools & Technologies

Git, Docker, npm, pip, composer, GitHub Copilot

### Graphics APIs

DirectX (DX11), OpenGL

### AI/ML Technologies

PyTorch, Machine Learning, LLM Development

### Languages

English, Dutch, Persian (Fluent in All)

## **Soft Skills**

Team Collaboration, Independent Work, Quick Adaptation, Continuous Learning

## Featured Projects

---

### ATOM-GPT

My own custom GPT model, developed for specific tasks and interactions. This project showcases my interest and capabilities in AI development and natural language processing.

[View on GitHub →](#)

### Laravel Instagram Clone

A complete social media platform clone built with Laravel, showcasing advanced web application development, RESTful API creation, authentication systems, and database management.

[View on GitHub →](#)

### External DX11 Screen Overlay

An advanced overlay application for visualizing objects on screen using DirectX 11. Demonstrates expertise in C++ development, Windows native applications, and graphics programming.
